

NIKHIL LATHER

Full Stack MERN Developer

+91 8168530783 | nikhillather02687@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack MERN Developer with over a year of professional experience building, optimizing and maintaining production-grade web applications, including an AI-powered SaaS product. Skilled in React.js, Node.js, Express and MongoDB, with a strong grasp of REST API design, JWT authentication, MVC architecture and third-party AI API integration. Proven ability to refactor code for performance, ship reliable features and collaborate effectively in a fast-paced development environment.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Styled Components, React Router, Recharts, jsPDF

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Bcrypt, MVC Architecture, Multer

Database: MongoDB, Mongoose ODM, Query Optimization, Aggregation Pipeline

Tools: Groq API (LLaMA 3.3), PDF/DOCX Parsing, Git, GitHub, Postman, VS Code, Render, NPM

Concepts: Full Stack Development, AI Integration, SaaS Architecture, Authentication & Authorization, CRUD Operations

PROFESSIONAL EXPERIENCE

MERN Stack Developer — NS3Edu

November 2025 – Present

- Build and ship full-stack features across the MERN stack, owning work from API design through to the React interface.
- Design and integrate RESTful APIs on an MVC structure, with request validation and centralised error-handling middleware.
- Implement JWT-based authentication and role-based authorization, including bcrypt password hashing and protected route middleware.
- Model application data with Mongoose schemas and improve slow endpoints using indexes and aggregation pipelines.
- Build responsive React interfaces from reusable components, with client-side routing and consistent state handling.
- Debug production issues and take part in code reviews to keep functionality and code quality consistent across the team.

Backend Developer — CloudDFN

June 2025 – October 2025

- Developed and maintained backend platform features using Node.js and Express.js.
- Built authentication and authorization flows for platform users, covering token handling, session validity and access control.
- Worked with MongoDB for data modelling and query handling across core platform modules.
- Reviewed pull requests and maintained code quality standards across the codebase.

PERSONAL PROJECTS

MyJobify | React · Node.js · Express · MongoDB · JWT | [Live Demo](#)

- Engineered a production-ready full-stack job tracking application with complete CRUD functionality, deployed live on Render.
- Implemented JWT authentication and role-based authorization, alongside RESTful APIs supporting filtering, sorting and pagination.
- Delivered an analytics dashboard with area and bar charts (Recharts) and a dark/light theme toggle to improve user experience.

Natours — RESTful Backend API for Tour Management | Node.js · Express · MongoDB · Mongoose

- Designed a scalable RESTful backend API for a tour booking platform, supporting advanced querying and pagination.
- Implemented JWT authentication, role-based authorization, MVC architecture and global error-handling middleware.

ATS Optimizer — AI-Powered Resume Analyzer (SaaS) | React · Node.js · MongoDB · Groq AI | [Live Demo](#)

- Built a full-stack AI SaaS application that analyzes resumes against job descriptions to help users beat ATS filters.
- Integrated Groq LLaMA 3.3 70B to generate match scores, missing-keyword analysis, improvement suggestions and tailored cover letters.
- Implemented PDF/DOCX resume parsing, one-click PDF export of analysis reports, a credit system and API rate limiting.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science

2026

Ganga Institute of Technology and Management
